

Introduction to Statistical Computing - STAT 445/645

Fall 2018—DMSC 106—Mon,Wed 2:30pm - 3:45pm

Instructor: A. Grant Schissler **Contact:** aschissler@unr.edu, 775-784-4661 (office)
Office: DMSC 224 **Hours:** Tue 2:30pm-3:30pm, Wed 1:30pm-2:30pm, or by appointment

Computational skills have become an invaluable asset in our increasingly quantitative world. This course introduces students to the foundational skills and concepts needed in modern statistical computing, with an emphasis on high-level programming languages and statistical applications. Throughout, students will produce professional-grade, reproducible documents.

There are three main units to the course: First, students learn to program in R, from basic data structures and flow control to advanced, efficient coding schemes (including *parallelization*). Second, students learn data manipulation, exploration, and visualization skill. Third, students will learn to conduct statistical inference through simulation (Monte Carlo) techniques and optimization of probabilistic functions.

Catalog Description

Introduction to statistical computing; data visualization and manipulation; document creation; graphics; simulation techniques; parallel computing; estimation; optimization; advanced statistical methods.

Course Pre-requisites

STAT 352 or STAT 467/667 or with instructor approval.

400-level Student Learning Outcomes

UG1 Students will be able to implement statistical simulation, re-sampling techniques, and maximum likelihood estimation.

UG2 Students will be able to conduct a simulation-based power analysis.

UG3 Students will be able to write professional quality reports and computer code.

600-level Student Learning Outcomes

GRAD1 Students will be able to use statistical computing methods to complete a research project and effectively communicate their findings.

Textbooks

None required. Supplementary texts:

- Rizzo, M. *Statistical Computing With R*. 2008, Chapman & Hall/CRC.
- Efron, Bradley, and Trevor Hastie. *Computer age statistical inference*. Vol. 5. Cambridge University Press, 2016.
- Golemund, G., Wickham, H. *R for Data Science*. 2016, O'Reilly.(Free at <http://r4ds.had.co.nz/>)
- The R Cookbook, by Paul Teetor
- The R Graphics Cookbook, by Winston Chang
- The Art of R Programming: A Tour of Statistical Software Design, by Norman Matloff
- Data Manipulation with R, by Phil Spector
- Software for Data Analysis: Programming with R, by John Chambers (advanced book)

Online resources

- Course website: <http://www.grantschissler.com/teaching/FA18/STAT445>, includes a working course schedule and approximate due dates of assignments and exams.
- Course github repo: <http://github.com/grizant/STAT445>
- DataCamp for online modules: <https://www.datacamp.com/home>
- Students are responsible for checking WebCampus (<http://wcl.unr.edu>) and their email accounts, and are assumed to be aware of all information posted to these sources prior to each meeting.

Assignments

The instructor will assign online modules in DataCamp (approximately) weekly. Additionally, the instructor will assign roughly one “lab” assignment per week. These two types of assignments are categorized as “Assignments”. Students will complete the online modules individually while lab assignments may be completed collaboratively. You are highly encouraged to discuss assignments between each other and with instructor. However, the works must be completed and submitted individually. All assignment, submissions, due dates, and feedback (grading) will be handled via WebCampus.

Exam policy

You will be allowed at one 8.5x11in page of handwritten (on both sides) notes for each midterm and three such pages for the final exam. If you believe that your grade for exam or assignment is incorrect, contact instructor at the office hours with a rational justification. All such requests must be submitted to instructor within one week after a grade is announced; late requests will not be granted. The final decision about new grade is made by the instructor. Please understand that everyone can make a mistake, and that mistakes can go both ways: higher or lower than original grade.

Midterms

There will be two midterms, the first on Wednesday, October 3, and the second on Wednesday, November 7.

Final exam

A comprehensive final examination will be held on Wednesday, December 19, 12:10pm - 2:10pm, DMS 106.

400/600 Students

As indicated above, the student learning outcomes differ at the 400 and 600 levels. Students enrolled at the 600 level are required to complete a **term project** due the last day of class — December 12. Graduate-level assignments include project milestones (in addition to the assignment's 400-level requirements).

Makeup, Late Policy

Late online modules will receive a 50% point deduction. Late "lab" assignments will not be graded. As a safety factor for emergencies, the instructor will drop your lowest two grades in the "Assignments" category. Exceptions may be made when a student misses work due to documented (doctor's note) illness or other extraordinary situation, up to the discretion of the instructor. Late project work products (reports or presentations) will *not* be graded. If any project-related issue arises, students should discuss with the instructor immediately. Lastly, there will be no early or make-up exams. However, if you need to miss an exam due to participation in official university activities (including athletics and other sanctioned activities), you must make arrangements with the instructor at least two weeks prior to the exam in question.

Grading

The final grades will be determined using the following percentages:

Item	400-level	600-level	A	90-100
Assignments	40%	40%	B	80-89
Midterm Exams	40%	20%	C	70-79
Final Exam	20%	20%	D	60-69
Term project	—	20%	F	59 or below

The instructor reserves the right to deviate from the above percentages in special cases, including borderline cases (generally this could be +/- 3% points) may be given a + or within the above intervals or increasing the letter grade.

Diversity Statement

The University of Nevada, Reno is committed to providing a safe learning and work environment for all. If you believe you have experienced discrimination, sexual harassment, sexual assault, domestic/dating violence, or stalking, whether on or off campus, or need information related to immigration concerns, please contact the University's Equal Opportunity & Title IX Office at (775) 784-1547. Resources and interim measures are available to assist you. For more information, please visit <http://www.unr.edu/equal-opportunity-title-ix>.

Disability Statement

Any student with a disability needing academic adjustments or accommodations is requested to speak with the [Disability Resource Center](#) as soon as possible to arrange for appropriate accommodations.

Academic Conduct

No laptops, cell phones, mp3 players, or other electronics are to be used for personal reasons in class. If you are being disruptive during class you will be asked to leave. Disruptions in this context include inadequate participation. You must come to class on time and stay until the end of lecture. Tardy students will not be admitted to class. Please visit <http://www.unr.edu/student-conduct> for our official student code of conduct.

Academic Success Services

Your student fees cover usage of the University Math Center, University Tutoring Center, and University Writing Center. These centers support your classroom learning; it is your responsibility to take advantage of their services. Keep in mind that seeking help outside of class is the sign of a responsible and successful student.

University Recording Policy

Surreptitious or covert videotaping of class or unauthorized audio recording of class is prohibited by law and by Board of Regents policy. This class may be videotaped or audio recorded only with the written permission of the instructor. In order to accommodate students with disabilities, some students may have been given permission to record class lectures and discussions. Therefore, students should understand that their comments during class may be recorded.

Academic Dishonesty

Cheating, plagiarism, or otherwise obtaining grades under false pretenses constitutes academic dishonesty according to the code of this university. Academic dishonesty will not be tolerated and penalties can include canceling a student's enrollment without a grade or giving an F for the assignment or for the entire course. See the University Academic Standards policy: [UAM 6,502](#).

Tentative course schedule

Week	Unit	Monday	Wednesday
1	1: R Programming	Course structure/R/RStudio/RMarkdown/git	Data structures in R
2	1: R Programming	Labor Day (no class)	Conditionals, flow
3	1: R Programming	Loops, functions, apply	Lab
4	1: R Programming	Writing functions (advanced)	Lab
5	1: R Programming	Writing efficient R Code (e.g., PARALLEL)	Lab
6	1: R Programming	Review session	Midterm 1
7	2: Working with data	Importing data	Lab
8	2: Working with data	Cleaning data	Lab
9	2: Working with data	Exploratory Data Analysis (EDA)	Lab
10	2: Working with data	Data viz/grammar of graphics (GGPLOT2)	Lab
11	2: Working with data	Review session	Midterm 2
12	3: Statistical inference	Veteran's Day (no class)	Simulation/probability
13	3: Statistical inference	Monte Carlo integration/randomization tests	Lab
14	3: Statistical inference	Re-sampling (Bootstrap/jackknife)	Lab
15	3: Statistical inference	Maximum likelihood estimation (MLE)	Lab
16	3: Statistical inference	Markov Chain Monte Carlo (MCMC)	Lab/ presentations
17	All		Final exam
