Instructor: AG Schissler Course: STAT 445-645

Unit title: Intro to R Lesson title: Intro to the course

Date(s): 27 Aug 2018 Lesson length: 75 min

Type of lesson:  $\boxtimes$  Acquisition  $\square$  Extending/refining  $\square$  Assessment

Unit Learning Outcomes	Students will be able to (SWBAT) use R to store/manipulate data and
J	create reproducible documents in R Markdown.
Beginning of class	5-10 min, use "primary" effect
Engagement trigger:	Interactive R demonstration; rationale for learning/personal story
Most important information:	Show website, syllabus, learning outcomes, rubrics
Start-of-class-work:	open R Studio and navigate to course website
Middle of class	10-20 min segments, follow "I do", "We do", "You do"
Segment 1 learning outcomes:	SWBAT use course resources and basic git commands
Strategies:	Instructor leads tour of website, Canvas, forum, github
	Students use git and web browser to retrieve R demonstration
Segment 2 learning outcomes:	SWBAT use R Markdown to produce HTML, PDF, or Word documents
Strategies:	Instructor demonstrates/discusses R Markdown in RStudio
	Students compile ("knit") an R Markdown document
Segment 3 learning outcomes:	SWBAT use DataCamp for online, independent learning
Strategies:	Instructor tours DataCamp and expectations
	Students enroll, tour, play for a bit
Segment 4 learning outcomes:	
Strategies:	
Dirategies.	
End of class	5-10 min, "Recency" effect, Student-led summary, balance/vary activities
	Answer the following "What?", "So what?", "Now what?"
